The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1-7, 9, 13, 15, 18 and 19 are rejected under 35 U.S.C. 102(b) as being anticipated by CA '236.

CA '236 discloses particle mixtures comprising 3 or more components each with a different particle size (see examples and claims). Among the components is carbon black, which is seen as functioning as a lubricant and an anti-agglomerating agent. Therefore, the reference anticipates the rejected claims.

Claims 8, 10-12, 14, 16, 17 and 20 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.
